

MARYAM GHASHGHAEI

Front-End Developer

Germany • maryam.ghashghaei@hotmail.com • 015904695387 • linkedin.com/in/maryam-ghashghaei/

SUMMARY

Spearheaded the delivery of scalable engineering solutions for web applications using React, JavaScript, and TypeScript, contributing to 8+ successful production deployments across insurtech and e-commerce domains. Leveraged SPA architecture, REST API integrations, component-driven development, and CI/CD pipelines to enhance performance, accessibility (WCAG), and responsive design standards, improving system stability, user engagement, and operational efficiency by up to 30%. Backed by 5+ years of experience in performance optimization, testing strategies, and cross-functional collaboration within Agile environments.

SKILLS

Frontend: React, Vue.js, Next.js, JavaScript (ES6+), TypeScript, SPA Development, Component Architecture

Styling & UI: Tailwind CSS, SCSS, Bootstrap, Material UI, CSS3, Responsive Design

Testing: Unit Testing, Jest, Vitest, Cypress, Load Testing

Performance & Quality: Performance Optimization, Performance Monitoring (Lighthouse), Accessibility (WCAG), SEO Optimization

DevOps & Tools: Git, GitHub, Git Workflow, CI/CD Pipelines, Webpack

Backend Integration: RESTful APIs, API Integration, API Interceptors, Java, PHP

Databases: MySQL, PostgreSQL

PROFESSIONAL EXPERIENCE

Front-End Developer
Six Offene Systeme GmbH
Berlin, Germany (Remote)

Jan 2024 - Present

- Developed enterprise web applications for project collaboration and digital asset management, building scalable interfaces using React and modern JavaScript.
- Contributed to a centralized platform where teams could manage tasks, track deadlines, and monitor project activities through interactive dashboards.

- Built configurable client portals that allowed organizations to manage and distribute digital assets with advanced filtering and customizable branding.
- Integrated frontend systems with backend services through REST APIs to support dynamic data-driven workflows.
- Worked within modern engineering processes including CI/CD pipelines, collaborative version control, and agile development practices.

Front-End Developer

Aug 2021 – Jul 2023

HEPSTER online Versicherung GmbH
Rostock, Germany

- Architected scalable React/TypeScript SPA applications, eliminating performance bottlenecks and increasing runtime efficiency by 30%.
- Optimized UI interaction layers alongside UX/UI teams, raising conversion rates by 15%.
- Designed a modular client dashboard that reduced support ticket volume by 22%.
- Integrated Storybook-based component documentation, accelerating feature rollout cycles by 20%.
- Standardized Git workflows and code quality practices, elevating team productivity metrics by 18%.
- Implemented structured REST API consumption layers with centralized error handling, improving data consistency and application resilience.
- Resolved technical SEO deficiencies, increasing organic traffic and search visibility by 20%.
- Strengthened system reliability through comprehensive Unit Testing and load testing strategies, lowering production failures by 25%.
- Consolidated reusable UI elements into a unified Design System, shortening development timelines by 26%.
- Automated CI/CD validation gates and optimized build pipelines, decreasing deployment defects by 18%.
- Enhanced rendering strategies via lazy hydration and adaptive loading techniques, improving load stability by 24%.
- Configured an extensible admin console enabling dynamic theme and layout control, reducing configuration effort by 35%.

Front-End Developer

Sep 2020 - Aug 2021

BELVINI - Wine Merchants
Berlin, Germany

- Launched a high-traffic e-commerce platform that contributed to a 40% increase in sales revenue.
- Introduced a voucher management system that expanded customer acquisition by 14%.
- Redesigned checkout workflows to minimize friction, increasing purchase completion rates by 12%.
- Accelerated page load performance through frontend optimization techniques, driving a 25% rise in user engagement metrics.
- Structured responsive design improvements across product pages, ensuring cross-device compatibility and usability consistency.

Front-End Developer

Oct 2017 - Mar 2020

SON Corporate Group

Tehran, Iran

- Delivered enterprise-grade web applications that improved customer engagement and platform usability.
- Engineered a custom scripting layer within a spreadsheet-based financial system, enabling non-technical users to generate dynamic forms.
- Digitized internal financial workflows, increasing employee productivity by 20%.
- Streamlined legacy frontend codebases and performance routines, reducing system downtime by 13%.

EDUCATION

Master's Degree in Computer Engineering | Payame Noor University — Tehran, Iran

Bachelor's Degree in Computer Engineering | Azad University — Kashan, Iran

LANGUAGES

Persian — Native

English — Advanced

German — Intermediate (B2)
